

Full facility panel

MOE General Waste Treatment Survey, FY2005-FY2024

23,599 facility-year rows before the analytical split

A. Adoption frame

At-risk facilities first seen without generation

13,770 facility-years | 2,035 facilities | 141 events

Signal: selective modernization

B. Generator frame

Operating generators with positive throughput and output

5,683 observations | 1,016 facilities

Signal: bounded responsiveness

Synthesis

Entry into generation and performance within generation are different estimands.
