

Full facility panel

MOE General Waste Treatment Survey, FY2005-FY2024

23,599 facility-year rows

A. Adoption frame

At-risk facilities first seen
without generation

13,770 facility-years | 2,035 facilities

141 observed first-adoption events

Signal: selective observed entry

B. Generator frame

Operating generators with positive
throughput and output

5,683 observations | 1,016 facilities

Signal: persistent generator hierarchy

Synthesis

Entry into generation and performance within generation
are different estimands in one linked fleet.
